

Changing the Orientation of the Grid Manager

The orientation of the Grid Manager in the GFE perspective is highly configurable. The Grid Manager can be placed on any side of the Spatial Editor, and can even be detached from the CAVE window completely.

Step	Action	Notes
1	Left click and hold on the Grid Manager tab (image below). 	
2	Drag the Grid Manager tab to the desired location around the Spatial Editor.	Notice the software gives you a preview of how the Grid Manager will be placed by showing a white outline.
3	Release the left click when the Grid Manager is in the desired location.	
4	Left click and drag the Grid Manager tab outside the CAVE window to detach the Grid Manager from the Spatial Editor completely.
